

PigeonTech IT Solutions Ltd Website Design Prices Oct 2011

Our webdesign packages are designed to be flexible so you only pay for what you need. We support you through the entire process offering as much advice as you need. Some clients are very clear what they want and even present us with their own mock up of how they want the site to look. This makes the job of creating the website very easy as all the design work is already done. We just need to build the site.

Other clients come to us with no idea what they want. This is great for us because we then have a blank canvas to work from and our creativity can really flow.

Our basic websites are ideal for small businesses and individuals looking to establish a modern and effective online presence. With a free logo design and some great stock photography plus targeted keywords your website will not only look professional it will also attract customers.

For larger website we offer extra features such as more pages, flash animation, java script, enhanced logos and rich graphics with colour effects, all of which make for an even more professional looking website.
